Codifa

An evolved “Google”,
an intelligent information system

ONLINE SOLUTION

Codifa.it Premium www.codifa.it

Codifa.it took advantage of the 75 years experience of **L'Informatore Farmaceutico** and of **Codifa database**, the most important Italian database of all health products, drugs and more. It is an evolved “Google”, an intelligent information system that addresses the need to reduce errors associated with drug prescription and that offers physicians and pharmacists the best options to treat and counsel their patients.

Codifa.it can be used on all devices, desktops and laptops, but also tablets and smartphones thanks to the easy-to-use **WebApp version**.

Some of the main services:

- **Business and Professional Information:**

Reimbursement class, Mode Dispensation, ATC classification, Active Ingredient, Therapeutic Group, retail price and ex-factory, notes AIFA - Italian Drug Agency, Treatment Plan, PHT, description of the packaging, dosage form, storage temperature, DDD - Defined Daily Dose, phenylketonuria compatibility, celiac disease, diabetes

- **PILs – Patient information leaflets**
- **NHS of corresponding foreign medicines**
- **Generics, Associated diseases**
- **Interactions between drugs and natural substances**
- **Support system to prescription:** Intuitive system in four easy steps, it guides health professionals in evaluating the best treatment option for their patients

DATABASE SOLUTION

Codifa® database

Data mining from the **Codifa® database** in **excel file** gives you access to all information related to business and professional data such as prices, dosage

form, quantity, active ingredients, etc. Easy to use this is the best solution for all professionals looking for quick and targeted searches.

PAPER SOLUTION

L'Informatore Farmaceutico 2015

In 2015 **L'Informatore Farmaceutico** reaches a very special goal: 75 years as the daily partner of physicians and pharmacists for appropriateness of care. During all these years, **L'Informatore Farmaceutico** deserved and constantly confirmed this role thanks to comprehensive, timely and up to date information, available at all time. To reach the age of 75 is an important step for a man and exceptional longevity for a scientific publication.

Drug reference Volume

The most comprehensive and reliable information on drugs, compiled from the **Codifa®** database.

For each medicinal product:

- business information (price, prescription, drugs' reimbursability class, selling restrictions)
- therapeutic indications and dosage, from the patient information leaflet PIL
- **generics** with "Notes" and "Dosage" of the equivalent molecule
- icons for **contraindications**, use in pregnancy and breastfeeding and precautions for driving and operating machinery
- reference to possible **interactions** with other medicinal products
- indexes by substance and by ATC classification, for easy search of products and similar

Health products reference Volume

Too many products to choose from? Little or no reliable comprehensive information? This volume addresses the needs of healthcare professionals and keeps on being an essential daily support in selecting and using health products. The book contains detailed cards about indications, ingredients, any allergens, warnings, proper use of supplements, foods, cosmetics, medical devices, herbal products and much more.

New for 2015:

- Section on **plants and / or plant substances** used in the composition of health products. Paragraphs such as description, the most important chemical constituents, indications and methods of use, provide useful details for professionals' practical use.
- Section on **interactions between foods, plant substances and drugs**: an aging population, the polypharmacotherapy, the use of health products based on substances of plant origin and the increasing recourse to self-medication, are just some of the factors that most affect the likeliness of generating interactions between medical products or nutrients taken.

Professionals needing reliable and comprehensive information, finds **L'Informatore Farmaceutico** a valuable tool in their daily practice. This section, clear and to-the-point, offers the main interactions of foods, plants or plant substances with the active ingredient's pharmacological activity.

Product search is facilitated by an alphabetical index.

Addresses index Volume

The complete guide of **companies, wholesalers and distributors** working in the field: all details of the companies mentioned in the Drug reference Volume and the Health products reference Volume, together with the list of related products.

Combinations of purchase and prices

- **Complete edition** (three-volume set) Euro 149,00
- **Medicines + Addresses** (two-volume set) Euro 99,00
- **Health products + Addresses** (two-volume set) Euro 99,00
